(54) Title: IMPROVEMENTS IN OR RELATING TO THE HEATING OF PRODUCTS

(57) Abstract: Food products such as wraps (100) are displayed, sold and subsequently heated in a heating apparatus (200). Within the heating apparatus (200) are reactants, such as quicklime and water which, when mixed, generate steam. An individual steam nozzle extends within the interior of each wrap and is arranged such that the steam generated is injected into the food product within its outer wrapper. The outer wrapper therefore acts to form a steam container whereby efficient heating of each wrap is achieved. Generally, the outer wrapper acts as an insulator to enable the heated wrap (100) to be safely handled.

3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
